Educational & Affordable Electronic Kits for All Skill Levels

UNIVERSAL LEARN-TO-SOLDER KIT

Item Number: **C6758**
Unit Price: **$7.69**

Detailed Description

Here's the perfect kit to give students experience in learning soldering techniques for both standard and SMD components. The student begins by soldering various standard lead components such as transistors, capacitors and an IC socket. The student then progresses to SMD sections (on the reverse side of board) where the student practices soldering various SMD parts such as transistors, diodes, resistors, capacitors and an IC.

Finally, the student builds a functional Insanity Alarm Kit (C6240) which is constructed using both regular and SMD components so that some parts are on each side of the board. The Insanity Alarm operates on one 9V battery (not included).

Size of PC board: 2 1/2" sq. Kit is supplied with 33 parts, PC board and instructions. Skill Level 1.
