# Next time you need solder, make the connection with Thermoflow!

Thermoflow Solder is manufactured under ISO9001:2000 assessment standards and is available in a wide variety of alloy compositions to meet most electronic/electrical manufacturing requirements. Thermoflow Solder is packaged to meet your customers demands and is available in tubes, one half and one pound spools and in bar format for wave soldering or dip soldering machinery.

# QQ-200

QQ-200 is a no-clean flux for cored solder wire and is suitable for hand soldering both electronic components and electrical terminals. QQ-200 performance characteristics include excellent solder adhesion to a variety of surfaces, low smoke and odor and low splash during soldering which is common to most core fluxes. After soldering, QQ-200 no clean flux leaves a minimum residue which is transparent in color and eliminates the expense of cleaning. QQ-200 is compatible with leaded and lead-free solder, meets MIL-P28809 and QQ-S-571E and meets RoHS directives. Documentation available upon request

# OEM SYSTEMS CEILING & IN-WALL SPEAKER - GOOD

The ArchiTech Premium line is very well engineered... to sound great, be dependable and to deliver great value for the dollar. It has been engineered with high quality materials and careful design:

The long-throw woofer is made with a polypropylene cone and butyl rubber surround, (not a cheap foam surround), enabling it to create substantial low bass yet remarkably durable (lifetime warranty).

The tweeter is a 3/4" polycarbonate hybrid dome that is clean and accurate and pivots for best dispersion into the room. The crossover is technically a 2nd and 3rd order electro-acoustic crossover. This ensures the tweeter and woofer are well-controlled and deliver broad, smooth frequency throughout the room.

The Kevlar material used in the ArchiTech Kevlar series is an exceptional choice for high performance woofers. Its incredible strength enables low distortion music reproduction, while its lightness provides great detail and musicality. And it is amazingly durable for long life and environmental stability. Kevlar is 5 times as strong as steel of the same weight

These unique properties have enabled Kevlar to become a favorite material for applications as varied as bullet-proof vests, automotive parts, ropes for the Mars Pathfinder mission - and for the ArchiTech Series - cones for superb woofers.

The ArchiTech Kevlar Series is an excellent choice for custom installation applications where high quality music reproduction is required and rugged construction is appreciated. The Lifetime Limited Warranty is one indication of just how robust this family of loudspeakers really is.
