INTERCONNECT CABLES

ProLink ProLink's high-performance interconnect cables offer an exceptional value for all your signal transfer needs. Whether your choice is the Audiophile Series for exceptional high-end performance, the twisted ea Specialist Series for excellent noise rejection, or the Dual A/V Series for a one cable solution that transfers audio and video, ProLink has you covered!

PROLINK AUDIOPHILE SPA SERIES Designed for no-compromise, high-performance, audio signal transfer for high end home and car audio applications.

- Split center conductor • Gold-plated brass RCA connectors • Tough PVC outer jacket with internal molded strain relief • Hand-soldered connections • Twisted pair construction • Multi-stranded Oxygen-Free High-Conductivity (OFHC) copper wire • Teflon insulated center pin • RFI resistant foil shielding no-compromise, high-performance, audio signal transfer for high end home and car audio applications.

PART NO.	LENGTH	EACH	EACH / 12+

THERMOCOOL AXIAL FANS

Thermocool Axial Fans provide enhanced cooling for a variety of electronic devices. Leading air flow technology is designed into every Thermocool product resulting in reduced

turbulence, low noise levels and a more energy efficient product. Thermocool fans are ideal for use in computer systems, portable CD and DVD players, stereo components, overhead projectors, laptop computers, and many other electronic applications where circulation is a key concern. **RoHS**
